Main advantages of our web hosting services.

SSD POWERED

Our Web Hosting service is boosted by SSD technology, 10x times faster than a normal web hosting account.

Daily Security Backups

All your information is stored in daily security backups, any lost information can easily be recovered at any time.

Secure Emails

All your email accounts are protected by our integrated anti-spam and anti-virus system.

Monitoring and Support

All services are monitored 24/7 assuring optimal functioning and stability of all our clients websites.

PHP, MySQL, phpMyAdmin...

With our hosting services you'll be able to use any PHP version you require, from the 5.2 to the 5.6. Our servers are based on MySQL and phpMyAdmin.

Guaranteed Uptime

We have an uptime of 99% in all our hosting services (except for failures independent from the datacenter) and security interventions or updates that might be necessary.

cPanel Management

Take advantage of all that cPanel has to offer. Considered the best worldwide, with it you'll be able to manage any aspect of your account with ease.

General Information

We guarantee 10x times faster loading speeds for all of our clients, servers are more stable, faster, and they provide a faster loading speed for the website visitors.

You'll have access to advanced statistics, information about the resources your account is using, choosing the PHP version for your site and apps.

You'll also be able to access your webmail and read your emails online, manage and install your SSL certificates, and check the status of your account's servers.

cPanel Management

Have all the advantages of working with cPanel, with it you'll be able to manage easily your e-mail accounts, ftp access, MySQL databases and also monitor your web traffic and download your security backups.

You'll also be able to check other service informations like, occupied space, consumed traffic, etc...

Security Backups System

Don't risk losing data! For us, guaranteeing the integrity of our clients information is a priority!

As we work with a security backup system that will allow you to, at any time restore any file, or database, in just a few clicks.

The information can be restored by us whenever necessary.

Connection Speed

Our services are provided through a robust server, with connection up to 1 gbps located in a Lisbon datacenter.

Unlimited Features

All hosting packages have unlimited features from email accounts, ftp accounts, databases, sub-domains, traffic, redirects, allied to a responsible service usage.

Expand your internet business, with Premium SSD Hosting Quality

Robust, Secure, Fast, Server Redundancy, **SSD technology**... all within your reach.
